for BarCamp Saigon

9/9/2012

Target Audience

- Java developers
- Programmers in any other language
- Their team leaders
- Testers

Target Audience

- Java developers
- Programmers in any other language
- Their team leaders
- Testers

Profesionals who

- feel safer
- sleep better
- validate their work

Agenda

- Intro - what and why
- Simple project with JUnit
- Adding Fitness
- Advanced topics

Our simple project

Everybody is talking about BarCamp.

Our simple project

Everybody is talking about BarCamp.

Task: is it a valid name?

Developers Work Algorithm

Test Driven Development

```
while (task.requiresWork())  
{  
    1. Write a failing unit test  
    2. Write implementation  
}
```

Why Unit Testing

- make sure that foundations are OK
- create better (extensible) design
- think about edge cases

Tools

- Eclipse (IDE) www.eclipse.org
- JUnit (unit testing library) www.junit.org

Tools

- Eclipse (IDE) www.eclipse.org
- JUnit (unit testing library) www.junit.org
- Fitness www.fitnesses.org

Time to play

- JUnit
- Fitness

Time to play

- JUnit
- Fitness

Why another tool?

- accessible to non-programmers
- examples can be created during analysis
- may overlap with junit / preventing duplication?

Unit Testing Books

- Kent Beck:
Test Driven Development by Example (2002)
- Martin Fowler:
Refactoring: Improving the Design of Existing Code (1999)
- Michael E. Faethers:
Working Effectively with Legacy Code (2004)

Advanced Topics

- dealing with dependencies (mocks, stubs)

Advanced Topics

- dealing with dependencies (mocks, stubs)
- running tests automatically

Advanced Topics

- dealing with dependencies (mocks, stubs)
- running tests automatically
- acceptance tests driven development (ATDD),
specification by example (cucumber)

Advanced Topics

- dealing with dependencies (mocks, stubs)
- running tests automatically
- acceptance tests driven development (ATDD),
specification by example (cucumber)
- when unit tests do not pay off?
